Solutions for the toughest requirements

▶ THE COMPANY

The company Triathlon System GmbH

Triathlon System GmbH headquartered in Fürth/Bavaria and branch offices throughout Germany is your specialist for battery-assisted power supply systems.

Our high level of technical know-how and the long-standing experience in battery and charger technology are the best basis for comprehensive and competent advice.

Systems for emergencies and demand peaks

Our product range includes batteries of all common technologies as well as safety lighting systems, UPS systems, DC power systems and systems for many other applications. Our assembly and service teams are responsible for the installation and the smooth functioning of the products and systems.

We respond to the changing, tough conditions, in which our batteries and power supply systems are used, with endurance, engagement and maximum power.

Endurance. Engagement. Power.

▶ THE EMPLOYEES

The team of Triathlon System GmbH

Sound advice and individual service are only as good as the people performing it. Thus, highly motivated specialists support you with help and advice at Triathlon System GmbH.

In the following departments, our experts implement your wishes and plans.

- ▶ The **Sales department** of Triathlon System GmbH gives you professional advice and prepares offers tailored to your needs.
- ▶ The **Order processing department** ensures that your enquiries and orders are implemented as quickly as possible.
- ▶ In the **Service department**, our experts solve your technical problems and perform repair and maintenance work.
- ▶ Our employees in the **Shipping department** deliver your ordered goods as quickly as possible to you.

Of course, all specialist departments work closely together in order to be able to provide you with optimum advice and information during all order phases.

Whatever your questions and wishes concerning your battery systems are: do not hesitate to contact us personally!

We always give you reliable and competent advice.

Sales department

Systems and solutions - perfectly tailored to your needs and easily implemented.

Service & Customer service

Professional deployment of our service technicians with optimally equipped service vehicles.

Order processing department

Your enquiries and orders are in the best of hands with us.

Shipping department

Our warehouse and shipping department is perfectly coordinated for the quickest possible delivery of your goods.

▶ STATIONARY BATTERIES

Many areas of today's life are inconceivable without power supply. Therefore, it is all the more important to fall back on a **high-performance emergency power supply** in case of power failures and disturbances.

Triathlon System GmbH is your reliable and experienced partner for battery systems that are used in particularly demanding areas. We provide advice regarding the choice and planning of your systems and will be pleased to continue our support beyond the production and installation of your system. Always true to the slogan:

Total commitment under the most difficult conditions!

We offer high-performance battery technologies for your individual application.

- ▶ **OPzS batteries**
- ▶ **OPzV batteries**
- ▶ **OGi batteries**
- ▶ **AGM/gel batteries**
- ▶ **Industrial Ni-Cd batteries**
- ▶ **BPS power supply**
- ▶ **UPS systems**
- ▶ **Safety lights**
- ▶ **Safety lighting**

**Maximum safety for
your equipment!**

▶ SERVICE

The all-round service of your Triathlon System GmbH

The professional handling of battery systems is an important factor to meet the constantly increasing requirements in energy supply.

Against this background, regular service of your power supply system pays off twice.

The reason: Professional maintenance both ensures reliable operation and extends the service life of your capital goods.

Take advantage of these benefits and rely on our **professional service with a regional team.**

As a matter of course, we perform the service agreed upon with you on time, accurately and at a consistently high level of quality.

► SYSTEM TECHNOLOGY

Powerful systems for battery-operated power supply

In many areas of public life, it is unimaginable to do without battery-assisted power supply. For this, we offer you solutions for the most diverse applications.

BPS systems for particularly reliable power supply

Battery-assisted central power supply systems (BPS) are used for supplying medical locations. In the event of a failure of the central power supply, they maintain the operation of important devices in intensive care units and operating rooms in hospitals as well as doctor's offices and health centres. Systems that can save lives.

UPS systems offer top performance without interruption

A UPS system is an uninterruptible power supply and used to secure the supply of critical consumers in the event of disturbances in the power grid.

Our systems use top-level technology. In the event of a failure of the mains power supply, our products guarantee maximum continuity in the mains power supply and are absolutely reliable.

Powerful systems for permanent top performance
